Drew University’s Research Institute for Scientists Emeriti (RISE) will honor Kallyope, Inc. team members Nancy Thornberry, chief executive officer, and Ann Weber, senior vice president for drug discovery, as the first recipients of the Heroes in Drug Discovery award.

Nancy Thornberry and Ann Weber’s work led to the discovery of major Merck pharmaceuticals, such as Januvia (sitagliptin) and Marizev (omarigliptin) for the treatment of Type 2 diabetes.

After the presentation of the award, join Dr. Weber for a seminar, “Januvia and Beyond, Dipeptidyl Peptidase 4 Inhibitors for the Treatment of Type 2 Diabetes”, describing the team’s outstanding research efforts. The evening concludes with a reception to celebrate their accomplishments.

This event is made possible through the generous support of Pfizer and the Independent College Fund of New Jersey (ICFNJ).

RSVP by April 8.
